

ESTANTE Shelving

Features:

Estante is a modular piece of furniture with acoustic properties. The metal shelves form the platforms upon which everything else is built. Oak pillars and feet are attached before the distinctive upholstered elements are simply slid into place. These panels, along with the upholstered doors are sound absorbing, transcending their obvious decorative function. The perforated steel forms an attractive texture minimising interference with the acoustic properties of the piece. The furniture's highly configurable design enables it to be used as sideboard, bookcase, television stand or a divider, to name but a few potential use cases.

Options:

- Doors: Aluminium door, Aluminium and upholstered door combination

Design: JUAN IBANEZ for SANCAL

Warranty: 5 years

Finishes:

Shelves: Aluminium
