

# Tipo Nesting

## Features:

Tipo nesting chairs, are manufactured from 100% recycled materials, and can be 100% recycled. Recycled waste containers, car parts and PET bottles were used in the production of Tipo.

The light weight flip up seat is perforated on the underside with progressively larger holes from the edge to the center that account for the distribution of body pressure points. That is not only aesthetically pleasing but improves comfort. Moderate breaking structure works in any angle in order to avoid going down the seat suddenly.

Tipo is made in Japan.

**Design:** TAKU KUMAZAWA for AXONA AICHI

**Awards:** Good Design Awards in Japan, Reddot Design Award honourable mention Germany 2015
