SOL-SKETCH Whiteboard

Zenith

Features:

SOL-MIX is designed around four key pillars of contemporary working behaviours: facilitating spaces for formal or informal meeting situations, social aspects of our daily routines, creative collisions for knowledge sharing, and moments requiring retreat and focus.

SOL-Sketch is a double-sided whiteboard. The incorporation of large castors makes the board easily movable which enhances spontaneous work encounters and the ability to work flexibly around the office. It acts as the innovation hub for meetings, presentations, or simply as an efficient way to temporarily divide openplan spaces.
