

ZENITH

SANCAL

Hera

Hera

A comfortable lounge chair with reduced dimensions, both cosy and subtle at the same time.

HERA LOUNGE CHAIR

FEATURES

Constrained in its footprint but generous in its seat, this lounge chair allows you to maximise the limited space available in lounge, breakout and waiting areas. Ideal for projects that demand comfort be retained without pieces that dominate the space.

FINISHES

Removable seat cover in approved fabric.

DESIGN

CARE & MAINTENANCE

STAINLESS STEEL (POLISHED OR SATIN)

Do not use abrasive materials. Clean the surface with a soft cloth and alcohol.

ALUMINIUM (POLISHED, SATIN OR ANODISED)

Use a solution of water and alcohol and a soft cloth. Dry well and do not use abrasive materials.

CHROMED AND NICKEL-PLATED

These finishes require specific care to avoid the formation of oxide coating on the surface. Therefore, for chrome-plated surfaces, we recommend that you regularly clean the surface with a soft cloth impregnated in alcohol and then dry the surface well. For nickel-plated surfaces, we recommend that you regularly clean them with a wet cloth and dry immediately. Do not use abrasive materials.

EPOXY FINISHES

In order to avoid the formation of oxide coating, we recommend that you regularly clean the surface with a soft cloth impregnated in alcohol and then dry immediately. Do not use abrasive materials.

LACQUERED FINISHES

In order to avoid the formation of oxide coating, we recommend that you regularly clean the surface with a soft cloth impregnated in alcohol and then dry immediately. Do not use abrasive materials.

NATURAL FINISH (BEECH, MUKALI, OAK OR ASH)

We recommend that you regularly clean the surface with a soft cloth and specific products for wood. Do not use abrasive materials.

STAINED FINISH (BEECH, MUKALI, OAK OR ASH)

We recommend that you regularly clean the surface with a soft cloth and specific products for wood. Do not use abrasive materials.

LACQUERED FINISHES (MDF)

We recommend that you regularly clean the surface with a soft cloth and specific products for wood. Do not use abrasive materials.

POLYREY FINISHES

Clean the Polyrey surface with a soft cloth and with appropriate products for wood. Do not use abrasive products.

GLASS

Avoid the use of abrasive materials that can alter or scratch the surface. Always use soft cloths. For tempered and acid-treated glass, especially on the lacquered or acid-treated side, it is recommended that you use a soft cloth, slightly dampened with water.

TEXTILES – GENERAL

Vacuum fabric regularly using an upholstery attachment, and low suction or brush with a firm upholstery brush. Turn & rotate loose cushions regularly. Treat spills and stains as soon as possible. Gently blot spills away with a dry cloth. Do not apply any liquid cleaner to the fabric as this may result in permanent marking. Dry in the shade away from direct heat and sunlight. Allow to dry thoroughly before reuse. Avoid exposure of fabrics & leather to direct sunlight, as this is likely to cause fading & damage.

LEATHER

Remove any dust in order to facilitate the natural breathing of leather. To do so, it is recommended to use a soft, dry cloth. Do not use bristles that may damage the surface. Avoid prolonged direct exposure to sunlight or direct heat sources in order to preserve the natural humidity and colour of the leather. In order to avoid leather dehydration and maintain its elasticity, it is recommended that you regularly (every 6 months) apply special creams for furs; pay special attention to areas that are more exposed to use, such as seats, arms and the top section of the back piece. Removing stains is very difficult. However, good results can be obtained by applying soapy water (a neutral soap) with a soft cloth right away. It must be rinsed properly and immediately dried. Do not, under any circumstances, use alcohol, acetone, detergents or any other type of abrasive substances.
