Zenith

HEALTH & AGED CARE

Designing Spaces that Care.

Healthcare environments are more than places of treatment. They are places of **reassurance, recovery, connection** and **care**.

As expectations of healthcare environments continue to evolve, design has an increasingly important role to play in how these spaces look, feel and perform. From welcoming arrival and waiting areas to consultation spaces, shared amenities and staff workplaces, every environment presents an opportunity to create a more considered human experience.

At Zenith, we believe care extends beyond clinical outcomes to the spaces that surround them. Through thoughtful furniture, warm materiality and a people-centred approach to design, we create environments that balance comfort, functionality and performance, while helping healthcare spaces feel more welcoming, intuitive and human.

A More Human Approach to Healthcare

Healthcare interiors are changing. Environments once defined primarily by clinical function are increasingly considering comfort, familiarity, wellbeing and the overall experience of patients, visitors and staff.

Zenith brings a design-led perspective to these spaces, combining the practical performance required of commercial environments with the warmth, materiality and attention to detail more traditionally associated with residential, hospitality and workplace interiors.

The result is furniture and environments designed not simply around a space, but around the people who experience it.

WELLNESS & COMFORT

Creating spaces that put people at ease.

The healthcare experience begins long before an appointment or consultation. Waiting, arriving, recovering, meeting and connecting are all part of the experience.

Comfortable seating, familiar materials and considered spatial arrangements can help create environments that feel calmer and more welcoming. From healthcare waiting areas to aged care lounges and retirement living spaces, design can help create environments that feel comfortable, familiar and distinctly human.

DIGNITY & INDEPENDENCE

Designed around the individual.

Good design should support people without defining them by their age, health or ability.

Supportive seating, appropriate proportions, considered armrests and intuitive furniture arrangements can help people move through and use a space with greater confidence. Just as importantly, furniture should feel contemporary and desirable, creating environments that respect the individual and celebrate every stage of life.

A SENSE OF HOME

Moving beyond the institutional.

For aged care and retirement living in particular, the environment is not simply a place people visit. It is home.

Natural materials, tactile upholstery, warm colour and softer, residential-inspired forms can help create spaces that feel familiar and personal rather than institutional.

From private rooms and intimate sitting areas to dining spaces and shared lounges, considered furniture helps create environments where residents can feel comfortable, connected and at home.

CHOICE & CONNECTION

Creating spaces for togetherness and retreat.

Care environments need to support many different ways of being. A resident may want to spend time with family, join friends for a meal, enjoy a quiet moment alone or participate in a larger social activity.

Providing a variety of settings gives people greater choice over how they engage with their surroundings and with one another. Individual seating, intimate conversation settings, communal tables and quieter retreat spaces can work together to create environments that encourage connection without compromising privacy.

INSPIRED BY NATURE

Bringing the outside in.

Connection to nature can bring warmth and softness to health and aged care environments.

Natural materials, organic forms and thoughtful connections between indoor and outdoor settings can help create spaces that feel calm, familiar and welcoming. Furniture can help strengthen this relationship, from tactile timber and nature-inspired colour palettes indoors to comfortable settings that encourage residents, patients and visitors to spend time outside.

FLEXIBLE BY DESIGN

Spaces that can adapt as needs change.

The needs of patients, residents, families and visitors can change throughout the day and over time. Furniture should provide the flexibility to respond.

A considered mix of seating, tables and adaptable settings can support everything from quiet waiting and personal respite to family visits, dining and shared activities. This flexibility allows environments to evolve around the people using them while maintaining a consistent and cohesive design language.

DESIGNED FOR THOSE WHO CARE

Supporting the people behind care.

The people who care for others need environments that support them too.

From spaces for focused work and collaboration to breakout areas and places to pause, thoughtfully designed staff environments can provide opportunities to connect, recharge and work effectively. Zenith's workplace experience brings another dimension to the healthcare environment, helping create better spaces for the people working behind the scenes.

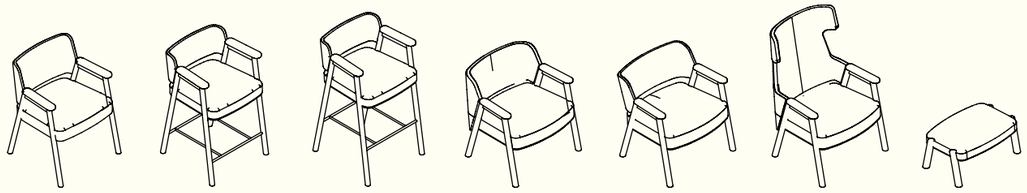

SOLUTIONS FOR HEALTHCARE

Considered furniture for every part of the healthcare experience.

From welcoming waiting areas and consultation spaces to shared amenities, staff workplaces and places of respite, Zenith offers a versatile portfolio of furniture solutions for contemporary healthcare environments.

Spanning seating, tables, workstations and collaborative settings, our collections bring together comfort, functionality and considered design, giving designers the flexibility to create spaces that feel cohesive, welcoming and distinctly human.

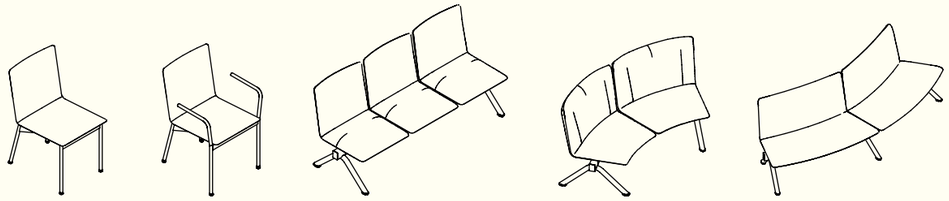

HEED COLLECTION

Care is not a sector. It’s a design principle.

HEED was inspired by the evolving needs of healthcare, aged care and retirement environments, yet designed for every space where comfort, connection and wellbeing matter. With its supportive form, warm materiality and contemporary aesthetic, HEED brings a sense of welcome to interiors across healthcare, workplace, hospitality, education and community settings.

Designed with versatility at its core, Heed features a signature wraparound backrest, warm timber frame and various specification options, creating seating that feels equally at home in a waiting room, breakout space, dining area or lounge.

Carefully considered. Beautifully resolved. Universally adaptable.

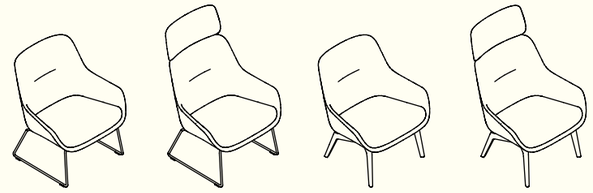

ALTER COLLECTION

Designed by Scott Fitzsimons, ALTER Dining and ALTER Beam bring together residential warmth, refined detailing and lasting durability for dining, breakout and public spaces. From the softly contoured dining chair, available with or without armrests, to the modular beam seating system, each design balances comfort, functionality and visual softness. Created for high-traffic environments, both retain ALTER’s distinctive character, offering versatile seating solutions that feel welcoming, purposeful and enduring.

ALYA TIMBER STOOL

Designed by Lievore Altherr Molina for Andreu World, the ALYA stool brings together comfort, considered design and versatility. Its inviting form and generous upholstery options create a welcoming seating solution for health and aged care, workplaces and hospitality settings. Balancing everyday comfort with refined aesthetics, ALYA offers a tailored finish to complement a variety of interior environments.

JAC COLLECTION

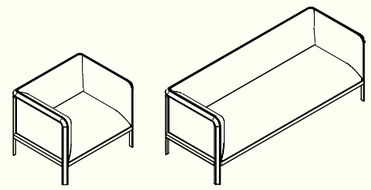

Combining sculptural design with exceptional comfort, the JAC collection brings effortless sophistication to contemporary interiors. The JAC Sled Armchair offers a refined silhouette with a modern edge, while the JAC Classic Lounge Chair delivers inviting comfort with timeless appeal. Designed to complement workplaces, breakout spaces and collaborative environments, both pieces balance considered aesthetics with everyday functionality.

With a versatile range of finishes and a tree planted for every JAC sold, the collection makes a lasting impression on your space and beyond.

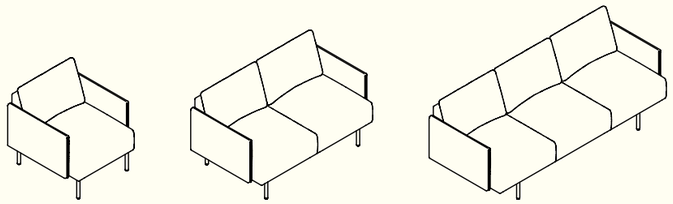

BASIS COLLECTION

The BASIS collection combines clean lines, considered design and everyday functionality. With its understated aesthetic and versatile seating options, the chair and bar stool bring a sense of warmth and simplicity to any interior. Balancing contemporary style with practicality, BASIS offers a timeless seating solution designed to complement a wide range of design schemes.

EASEL COLLECTION

Designed by Tom Fereday in collaboration with Zenith Design Studio, the EASEL collection brings together considered craftsmanship, natural materials and contemporary form. With its refined timber frame, soft upholstery and gently curved lines, EASEL creates inviting spaces that feel warm, comfortable and welcoming. Its timeless design and understated sophistication make it a versatile choice for health and aged care environments, as well as workplaces, hospitality settings and collaborative spaces.

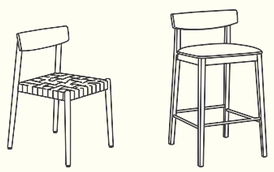

NOEN COLLECTION

The NOEN collection combines contemporary design with a refined, understated aesthetic. Defined by clean lines and thoughtful detailing, the collection brings a sense of simplicity and sophistication to modern interiors. Balancing visual appeal with everyday functionality, NOEN offers a versatile design that complements a wide range of interior styles.

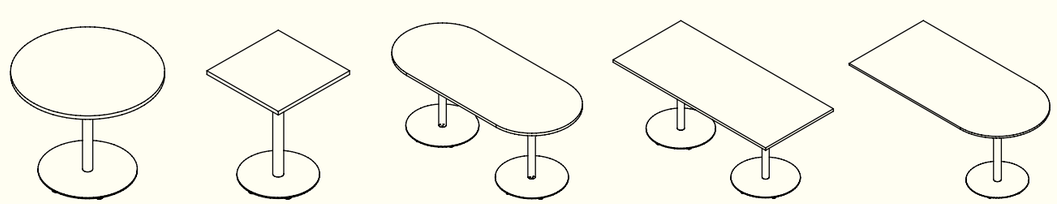

TIPO CHAIR

Designed by Taku Kumazawa for Axona Aichi, the TIPO chair combines lightweight construction with thoughtful ergonomics and contemporary design. Available with or without arms, TIPO offers versatile seating options to suit different needs and preferences. Its clean silhouette, practical stackable design and considered functionality make it a flexible solution for modern interiors, balancing everyday comfort with understated style.

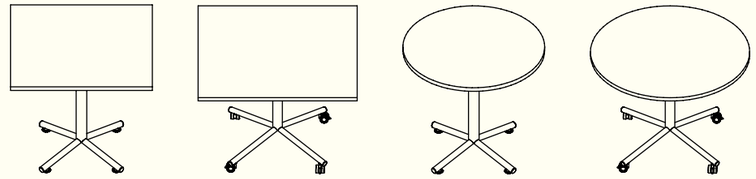

SMART COLLECTION

Designed by Piergiorgio Cazzaniga for Andreu World, the SMART collection combines contemporary elegance with thoughtful functionality. Featuring clean lines and a refined, minimalist aesthetic, the chair and stool offer versatile seating solutions with a strong design identity. Balancing comfort, durability and understated sophistication, SMART brings a timeless appeal to modern interiors.

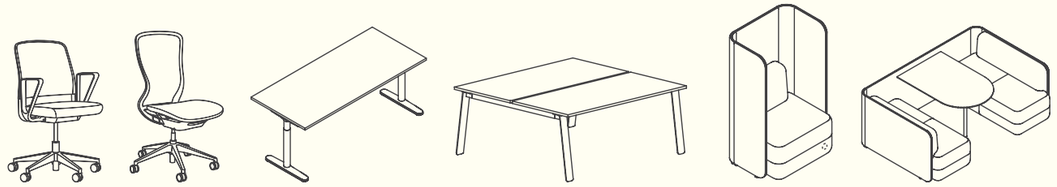

PRIMARY TABLE

The PRIMARY table collection combines clean, contemporary styling with everyday versatility. Featuring a distinctive disc base and a streamlined silhouette, PRIMARY offers a practical and refined solution for a variety of settings. Available in multiple sizes and heights, the collection brings flexibility, functionality and understated sophistication to modern interiors.

TWIGGY TABLES

The TWIGGY table collection blends pure geometry with lightweight engineering to create a refined, versatile solution for dynamic interiors. With its minimalist circular form, durable powder-coat finish and playful family of sizes, TWIGGY adapts effortlessly across work zones—offering stability, mobility and timeless design in equal measure.

WORKPLACE

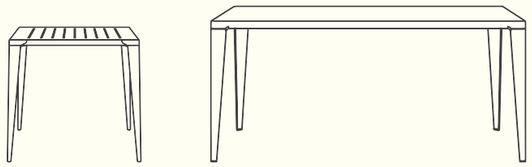

Zenith offers a considered range of workplace furniture designed to support comfort, wellbeing and everyday functionality. From ergonomic task seating, including the DENN and VOX chairs, to adaptable workstation solutions such as ORBIS and KISSEN, our range supports focused work, collaboration and changing workplace needs. The PRECINCT collection offers further flexibility for creating connected, functional environments. Combining thoughtful design with durability and versatility, Zenith delivers furniture solutions that support the people, activities and spaces at the heart of health and aged care.

OUTDOOR

PINO COLLECTION

Designed by Keith Melbourne, the PINO chair and table bring distinctive sculptural form and contemporary style to indoor and outdoor settings. The chair features a soft hexagonal frame and a gently contoured wire seat, with an optional seat pad for added comfort. Complementing the chair, the PINO table range offers versatile solutions for dining, café and casual settings. Together, PINO combines clean lines, thoughtful design and everyday functionality.

WB OUTDOOR TABLE

The WB Outdoor Table, designed by Yellow Diva, combines the warmth of natural spotted gum timber with the clean, industrial lines of a folded steel frame. Inspired by traditional butcher's blocks, its distinctive design brings character and functionality to outdoor settings. Locally made in Melbourne, Australia, WB pairs robust construction with timeless appeal, creating an inviting space for outdoor dining and social connection.

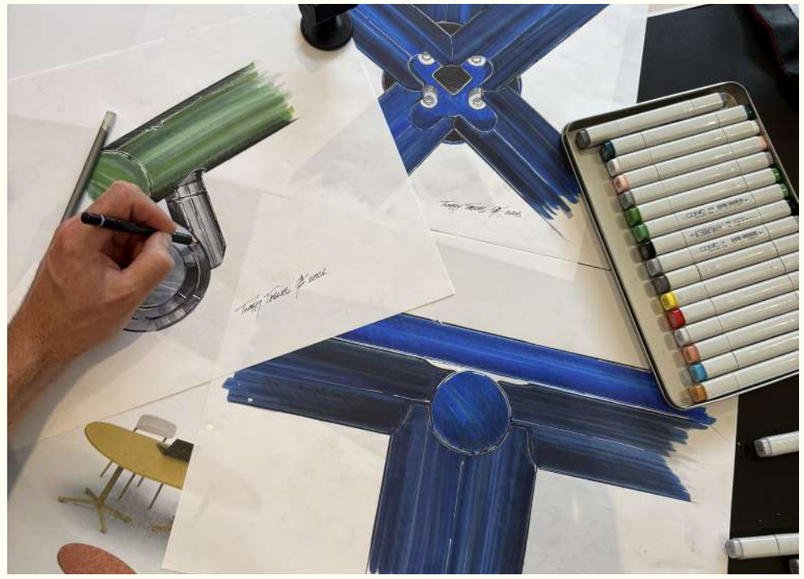

BEYOND THE PRODUCT

Capability from concept to completion.

Beautiful furniture is only one part of delivering a successful healthcare environment.

Zenith’s capabilities extend across furniture design, manufacturing, sourcing, procurement, logistics and project delivery, allowing our teams to support complex projects across multiple product and supplier streams.

- Hull Lounge Chair
- Jac 4 Leg Chair
- Precinct Focus Lounge

About the project

Royal Melbourne Hospital recently secured six floors at 635 Elizabeth Street, Melbourne, comprising five floors of office accommodation and one dedicated clinical floor.

Working alongside Gray Puksand, Zenith successfully tendered to provide a considered selection of furnishings that complement the interior design vision, centred on wellness, diversity and biophilic design. The result is a functional, flexible and welcoming environment that supports staff wellbeing, collaboration and an enhanced patient experience, while reflecting a commitment to thoughtful and sustainable design.

About the project

The new Farrer Village by Goodwin offers excellent lifestyle accommodation for seniors, nestled among the well-established suburb of Farrer in the A.C.T.

The spacious clubhouse acts as the heart of the village, providing a hub for village activity and a social space for all residents to enjoy. This remarkably designed building provides two floors of food and entertainment space, as well as an outdoor dining area.

The licensed café and bar is perfect for grabbing a coffee, drink or bite to eat, or simply catching up with friends and family. The fully-equipped gymnasium will allow you to enjoy exercise at any time, and the cinema, billiards room, library and events/games spaces means there's no shortage of entertainment.

- Precinct Ottoman
- SOL-Lap Table

About the project

Zenith Wellington delivered a full scheme of break-out, reception, clinician, consultation, and patient furniture for the newly opened Wellington Children's Hospital Te Wao Nui. Te Wao Nui is derived from Te Wao Nui a Tāne, the name translates as 'The Great Forest' and reflects the ecosystem of integrated health services designed for children, young people and their families. That is the significance of the natural colour palette and tree that encases the main internal staircase.

With a strong emphasis on hygiene and quality, we assisted with the selection and application of anti-microbial fabrics and surfaces for the furniture pieces supplied. Functionality and 'ease of use' were also at the forefront of the furniture selection process. A comforting colour palette in bold hues emphasised the important role furniture has in creating a welcoming, supportive and safe environment for tamariki, rangitahi and whānau.

About the project

The company's cutting-edge headquarters in Singapore was thoughtfully furnished by Zenith Products, creating a modern, functional and engaging workplace.

With a strong emphasis on height-adjustable workstations and ergonomic task chairs, the client recognised the importance of employee wellbeing and comfort, investing in innovative solutions that promote healthier work habits, flexibility and productivity. The carefully considered furniture selection supports a variety of working styles, fostering collaboration, enhancing the employee experience and reflecting the company's commitment to a progressive, people-focused workplace.

Global Biopharmaceutical Company

One Partner. A Broader Perspective.

Healthcare environments are complex, but the experience they create should feel considered and cohesive.

From the furniture people interact with every day to the spaces where teams work behind the scenes, Zenith brings together design thinking, product and project capability to help create environments that support the many dimensions of care.

Thoughtfully designed. Made for people.

Zenith

We've worked with interior designers, architects and workplace curators for many years. Together, we've developed a range of internal workspace environments. We work alongside these curators of modern workspaces to redefine the environments where people live, work, socialise, interact and learn.

Contemporary workplaces have to combine leading edge technology and physical elements in a way that produces productive environments for organisations. And every organisation is unique. So before we recommend a solution, we work hard to understand the organisation and the people who define its culture.

Our local teams and showrooms deliver the support you need. Our global logistics guarantees the highest quality product, service and delivery schedules.
