Heed

Design by Bang Design Studio

INSPIRED BY CARE. DESIGNED FOR EVERYWHERE.

Care is not a sector. It’s a design principle.

Heed was inspired by the evolving needs of healthcare, aged care and retirement environments, yet designed for every space where comfort, connection and wellbeing matter. With its supportive form, warm materiality and contemporary aesthetic, Heed brings a sense of welcome to interiors across healthcare, workplace, hospitality, education and community settings.

Designed with versatility at its core, Heed features a signature wraparound backrest, warm timber frame and various specification options, creating seating that feels equally at home in a waiting room, breakout space, dining area or lounge.

Carefully considered. Beautifully resolved. Universally adaptable.

A Family of Forms.

A consistent design language connects Heed’s lounge seating, stools and ottomans, allowing different pieces to sit naturally together. The collection offers scope to create coordinated arrangements, with colour and upholstery bringing cohesion or individual character to each piece.

Comfort in the Detail.

Firm upholstery provides a reassuring seated feel, while the timber armrests offer a defined place to rest. These considered details support the everyday experience of sitting, whether for a brief visit or a longer conversation.

Performance, Beautifully Integrated.

Upholstery brings colour, texture and practical performance to Heed. Two-tone combinations allow designers to subtly coordinate or contrast the seat and backrest, giving each element its own expression.

Performance textile options, such as Crypton, respond to everyday demands for spill resistance, durability and ease of care, with colours and textures to complement the interior palette.

Considered for Everyday Care.

Heed's open-back option provides easier access for cleaning between the seat and backrest, supporting ongoing maintenance while maintaining a light, refined appearance. Upholstery and configuration choices allow the collection to respond to each project's priorities, from frequency of use to cleaning requirements and the surrounding interior palette.

Designed for Ease and Comfort.

Across the Heed collection, seat heights of no less than 450mm are paired with an ergonomically considered seat depth to support ease of movement when sitting down and standing up. These thoughtful proportions help create a more comfortable and accessible seating experience for people with varying mobility needs.

Thoughtful Design. Everyday Living.

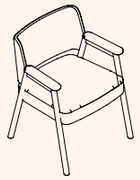

From a moment of rest to a shared conversation, Heed gives everyday experiences the consideration they deserve. A collection shaped by attention to how people sit, gather and feel— bringing the principle of care into daily life.

Bang

Design

Studio

Founded in 1989 by Industrial Design graduates Bryan Marshall and David Granger, their approach to design is shaped by curiosity, collaboration and a passion for creating meaningful solutions.

They believe great design comes from exploring new perspectives, embracing diverse ideas and challenging conventional thinking to uncover better possibilities.

For Bang Design, design is more than aesthetics. It’s a process of discovery and problem-solving, focused on creating solutions that are purposeful, relevant and make a difference.

Looking beyond the design itself, they consider every stage from concept and development through to how a product is presented and experienced. Every detail plays a part in creating a distinct identity and point of difference.

Ultimately, they strive to deliver thoughtful, innovative design that meets real needs and adds lasting value.

Zenith

We've worked with interior designers, architects and workplace curators for many years. Together, we've developed a range of internal workspace environments. We work alongside these curators of modern workspaces to redefine the environments where people live, work, socialise, interact and learn.

Contemporary workplaces have to combine leading edge technology and physical elements in a way that produces productive environments for organisations. And every organisation is unique. So before we recommend a solution, we work hard to understand the organisation and the people who define its culture.

Our local teams and showrooms deliver the support you need. Our global logistics guarantees the highest quality product, service and delivery schedules.
