

A close-up photograph of a modern armchair. The chair features a textured fabric with a repeating geometric pattern in shades of beige and brown. The frame is made of dark red wood, with a thick, tapered leg visible in the lower left. The chair is positioned on a light-colored surface, and a soft shadow is cast to the right. The text 'Zenith' is printed in white at the top center, and 'Alter' is printed in a large white font across the middle of the chair's backrest.

Zenith

Alter

Design by Scott Fitzsimons

Minimal & elegant expression

Zenith's ALTER collection, designed by New Zealand-based Scott Fitzsimons, redefines the modern workplace with elegant solutions for every interaction from impromptu chats to formal meetings. Featuring a minimalist aesthetic, ALTER's extended range includes lounge chairs, benches, and coffee tables featuring timeless timber finishes and soft inviting seating.

Also available in a durable steel frame, the ALTER Metal range offers a stylish yet robust option for high-traffic spaces, such as dining, breakout, and reception areas. Together, the Alter range embodies the perfect balance of charm, warmth, and functionality for the cultivated workspace.

The beauty of solid wood is celebrated in the refined frame, gently supporting the soft and inviting seating surfaces above and matched with a warm palette rarely seen in workplace furniture. By humanising the workspace and emulating the aesthetic of the domestic environment, we experience a sense of familiarity and emotional comfort.

Modular by design. Comfortable by nature.

Designed for high traffic public and institutional spaces, Alter Beam extends the refined language of the Alter collection into a modular beam system that balances durability, comfort and visual softness.

With options for concave and convex seating, integrated tables, power, armrests and back to back configurations, Alter Beam adapts effortlessly to airports, education settings, healthcare environments, workplaces and public foyers.

Alter Beam is a flexible beam seating system created for spaces where people dwell, wait, connect and move. Drawing on the sculpted comfort of the Alter Lounge and Chair, each seat is shaped as a defined personal space introducing rhythm, warmth and ergonomic support to environments often dominated by rigid, linear furniture.

Timeless & Elegant

Built from solid materials that will last beyond passing trends and endure the rigours of the modern commercial office.

Scott Fitzsimons

Scott Fitzsimons Studio is a strategic multidisciplinary design office based in New Zealand, with a focus on creating original and meaningful objects, spaces and brands.

Our passion lies in the creation of products with an underlying philosophy of simplicity, timelessness and permanence. Our work is not based on fashion or trends, but rather, is authentic and honest.

A deep understanding and passion for materials and processes is the driver behind the studio achieving a high level of detail and craftsmanship in our work. We are uncompromising in our pursuit of quality.

We design products that are durable, functional and engaging, combining innovative functionality with a restraint and visual reduction in aesthetics, and meticulous attention to detail.

We are devoted to designing products that are environmentally and socially responsible and user requirements.

"The ALTER range is designed for both the planned and the impromptu, as a mobile collection of seating and occasional tables that offers a nimble approach to social or formal gatherings in the workplace. Offering a space for nomadic workers to choose where and with whom they work. A space where impromptu meetings for the sharing of ideas and collaborative discussions can occur. The ALTER range offers a lounge setting that feels familiar, where one can pause alone to focus on the task at hand, and equally, serendipitous connections and social interactions can occur."

Scott Fitzsimons

Zenith

We've worked with interior designers, architects and workplace curators for many years. Together, we've developed a range of internal workspace environments. We work alongside these curators of modern workspaces to redefine the environments where people live, work, socialise, interact and learn.

Contemporary workplaces have to combine leading edge technology and physical elements in a way that produces productive environments for organisations. And every organisation is unique. So before we recommend a solution, we work hard to understand the organisation and the people who define its culture.

Our local teams and showrooms deliver the support you need. Our global logistics guarantees the highest quality product, service and delivery schedules.
