# GEAR Tables

Zenith

## Features:

Gear is inspired by Brutalism Architecture from the mid-20th century.

The sculptural coffee tables are designed as block-like structures, reflecting architectural building components of concrete. The Gear Tables comes with a circular table top, resting on top of three cylinder shaped legs. The legs are characterised by a riffled detail, adding a refined and organic signature to the architectural design.

The Gear coffee table is cast in lightweight fiber concrete, which creates a unique surface texture and increases mobility. Each piece is hand painted with multiple layers of paint, creating a unique and textured surface.

**Design:** KRISTIAN SOFUS HANSEN & TOMMY HYLDAHL for NORR11

**Warranty:** 5 years

## Finishes:

Made from a blend of concrete & magnesium oxide. Pads for table legs.

## Colour Options:

Chai

Chalk

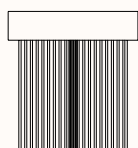

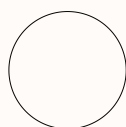

Earth

Clay
