# TALO Lounge Range

## Zenith

### Features:

The Talo takes a new approach to the traditional small armchair – a must-have for any hotel. Discreet and distinctive, the design is a departure from all others, yet retaining a familiar form. The Talo is extraordinarily comfortable, making it the ideal piece for a range of settings.

No detail has been left to chance: from the extra thick piping that runs across the top of the piece to the special two-part cushion. However, the most characteristic element of the Talo is its feet that thrust up under the fabric, like the roots of a mangrove tree, just visible above ground level as they form the trunk.

Made in Spain.
