

# DIVIDUALS Ottoman

**Features:**

Dividuals Ottoman is a collection of upholstered poufs that connects complementary objects. Independent elements that can be used individually or as a whole. The cylinder can be slotted into the curve to create a single composition. When separated, the shapes are defined by the void between them. This way, by changing the arrangement of the set, positive or negative matter gives the pieces one meaning or another.

Dividuals is part of the Museo Collection.
