BELITE Drafting Stool

Zenith

Features:

Belite collection of chairs and drafting chairs are the sweet spot where performance, conscience and value resonate. Cleverly engineered and constructed, Belite reflects the continuing trend toward environmentally conscious workplaces through the usage of sustainable materials. Belite chair is versatile, responsive and comfortable, flexing to accommodate every position and posture change to enable seamless integration into today's kinetic workplace.

The Flex seat offers a 270° radius of supported sitting with adjustable seat height and depth to suit your every need. Dynamic suspension automatically adjusts the recline resistance based on your weight, with four independent flexors on the suspension unit to respond to multi-directional movement. Innovative in its simplicity, Belite consists of only seven major parts, with construction from post consumer recycled PET bottles, corn by-products and foam derived from soy.
