KISSEN

Design by ZENITH Design Studio

A Distinct

Leg

Profile

Collection of tables, flip tables and workstations with a distinct leg profile. Derived from the German word for 'cushion', KISSEN's frame softens the workplace.

KISSEN is designed for the physical and functional requirements of today's diverse work modes; fostering connection whether in a social or collaborative setting. The family of tables and workstations feature a strong timber aesthetic with a distinct leg profile.

KISSEN Conference follows the same design language, directly complementing training and conferencing environments, with fixed and folding tables.

The interchangeable kit of parts and cable management, such as the omni duct, 96mm duct with vertical brackets, cable sleeve and felt baskets, allows KISSEN to seamlessly integrate into any work environment.

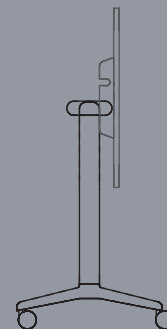

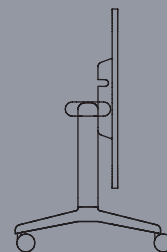

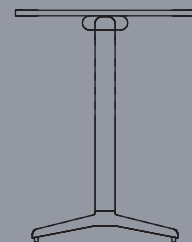

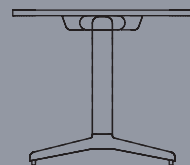

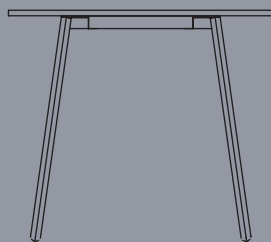

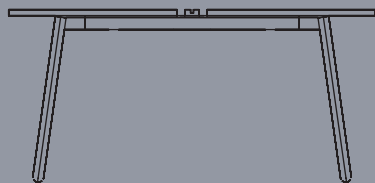

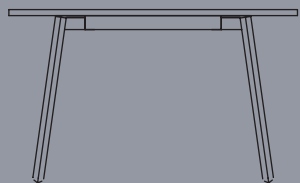

Through understanding the enormous potential of user-centred design thinking, this portfolio of tables and workstations celebrate the dynamic nature of the contemporary workplace.

With options in angled or linear legs, mobility, numerous table top shapes, KISSEN provides the all-important tools of both individual and collaborative working.

“Working with leading companies in Asia Pacific has allowed us to gain valuable insights into users’ needs in the emerging workplace.”

—Bob Stewart, ZENITH Design’s R&D Manager

Choice, freedom, flexibility and control

With a combination of finishes, sizes, heights and up to eight top shapes, KISSEN can adapt to any modern working or lifestyle environment.

KISSEN is equal parts functional and aesthetic, being the centre piece of a space or blending in with contemporary themes and features.

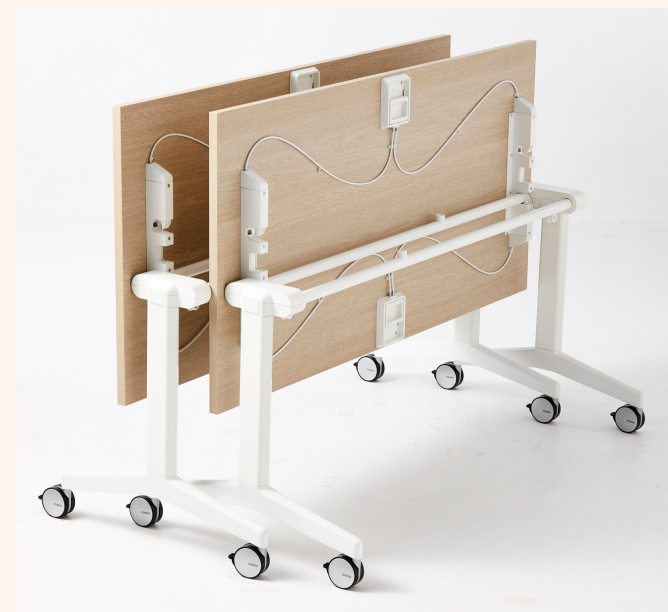

KISSEN

CONFERENCE

KISSEN Conference maintains the distinct design language with new settings to complement training and conference modes of work; adding value to the existing range of workstation pods, touch down teach tables and collaborative tables.

KISSEN Conference offers fixed or folding tops with an omnifold feature, allowing for activation from both sides and rapid usability. The lightweight frame also makes it easy to move and reconfigure.

With seated or standing heights, castors or glides as well as a variety of cable management options, KISSEN Conference's offering provides solutions to any working environment.

ADAPTABILITY

Adaptability is the ability of a system to change its configuration or function in response to changing requirements. This is a key characteristic of modern design, which is designed to be flexible and adaptable to changing needs. The design of a system should be able to change its configuration or function in response to changing requirements. This is a key characteristic of modern design, which is designed to be flexible and adaptable to changing needs.

Zenith Design Studio

We're a design and experience centric studio who create furniture solutions based on our intimate understanding of the workplace and workplace behaviours. We apply our expertise in interior architecture and product development to create progressive, high performance workspace solutions.

In our Design Studio you'll meet our team of 30+ experienced product designers, mechanical engineers, product configurators, immersive experience developers and visual content creators. Our cyclical process of listening, investigating, experimenting, and learning, provides a proven platform for understanding the unique requirements of our clients.

We've worked with interior designers, architects and workplace curators for many years. Together, we've developed a range of internal workspace environments. We work alongside these curators of modern workspaces to redefine the environments where people live, work, socialise, interact and learn.

Contemporary workplaces have to combine leading edge technology and physical elements in a way that produces productive environments for organisations. And every organisation is unique. So before we recommend a solution, we work hard to understand the organisation and the people who define its culture.

Our local teams and showrooms deliver the support you need. Our global logistics guarantees the highest quality product, service and delivery schedules.
