BE Task Chair

Zenith

Features:

BE task chair offers freedom of movement and support for the range of postures and tasks you perform throughout the day.

Be is a chair that follows your lead, responding to natural human behavior. With just three standard intuitive adjustments, seat height, seat depth and recline, while all other multidirectional movements require no adjustment at all.

Flex Seat offers 270° of flex without a hard frame or obtrusive levers along the seat perimeter. Be is available with adjustable seat height and depth with optional height adjustable arms for optimal comfort and customisability.

Options:

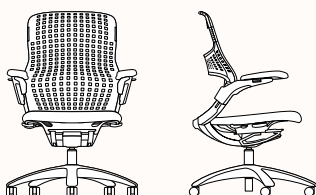

- High performance arms
- Adjustable lumbar support
- Hard or soft floor castors
