

X50 Stacking Chair

Features:

X50 is a versatile, comfortable and light weight stackable chair produced using recycled and recyclable materials. The sleek X50 chair has a flexible seat and back that forms to users' body pressure and allows for extremely compact stacking. The elasticity seat is a unique double mold construction that adapts to body contours and responds to body movements, providing a new level of comfort like a typical upholstered seat, yet is easier to clean. The innovative frame construction enables ultra high-density stacking of up to 50 chairs on the trolley and 18 chairs on the floor with or without armrests.

X50 made in Japan.

Options:

- With or without armrests
- Detachable writing tablet
- Felt glides
- Ganging glides
- Connect Rack
- Transport trolley
