FRAMED (S30/S50) Screen

Zenith

Features:
Framed Screens: S30 and S50 are exceedingly well resolved and comprehensive. The functional and aesthetic screens are both highly versatile and reconfigurable. They are structural elements that support a wide range of accessories and shelves. S30 and S50 have attractive clean lines that compliment the Zenith workstation ranges and lift the surrounding environment.

The S30 and S50 range includes junction posts and caps that will accommodate 90° and 120° 2-way, 3 way and 4 way intersections. The S50 screen is available fitted to the workstation AFFL, taken down to the floor or installed as a full height powerblade. The S50 panel can be fitted with mid level ducting wired, and in conjunction with the Hex post or Combi Post, provides hidden wire reticulation and a wide range of outlet options.
