

The Senator Group Care & Maintenance

Powder coat frames

Clean using a damp cloth with a mild solution of soap and water.

Chrome frames

Clean Chrome with a good grade Chrome cleaner to maintain bright finish. Occasionally Chrome leakage can occur on products that have just been delivered, again clean with cleaner to eliminate.

Fabric

It is recommended to seek advice from the relevant fabric or leather supplier if staining occurs. As a general guide, treat spills and stains as soon as possible. Gently scrape and soil and liquid from the surface of the fabric. Do not scrub. Do not apply water or any liquid cleaner to the fabric as this may result in permanent marking. Dry in the shade away from direct heat and sunlight. Allow to dry thoroughly before re-use.

Leather

Can be cleaned with a mild saddle soap.

Plastic

Clean using a damp cloth with a mild solution of soap and water.

Wood seating and tables

Wood can be cleaned with a water soluble solution to remove build-up of grease and grime (remove any excess water immediately). Wood products should not be subjected to extreme temperatures, particularly heat, moisture and direct sunlight.
