

FORK Dining Table

Features:

In Japanese culture, the tree represents man who lives in harmony with nature. Rooted in the ground and open to the gifts of the heavens. Also inspired by this superior balance, with its perfectly corresponding ideas, the Fork table pays homage to a combination of skilled Italian craftsmanship and Japanese minimalism. Thanks to its legs with an aluminium coupling and modular parts in various materials, the FORK table is part of a system, available in a vast range of shapes and heights, ideal for the office and the home. This is achieved when finding inspiration in nature.

Design: TOMOYA TABUCHI for LAPALMA
