EDUCATION

Shaping spaces

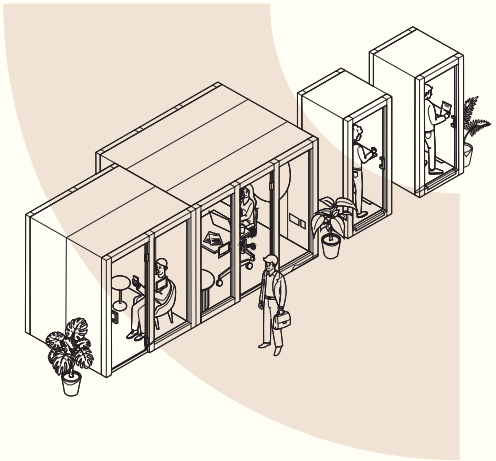

that shape minds

As educational paradigms evolve toward more dynamic, adaptive models, so too, the demand for agile, ergonomic, and visually engaging furniture to support this shift has increased. Educators and designers broadly recognise that the physical environment significantly

impacts learning by influencing student perceptions, engagement and outcomes. Creating spaces designed to energise diverse thinking opens up possibilities for creative problem-solving and innovative ideas amongst students and faculty alike.

Collaboration starts with the right space

Zenith has long understood that thoughtfully curated learning environments can enrich the educational experience. Whether libraries, laboratories, community or focus areas, we recognise the critical need for durable, multipurpose furnishings that can adapt over time. Our solutions support wellness, adaptability, unique work modalities and intelligently integrate technology for in-person or virtual learning.

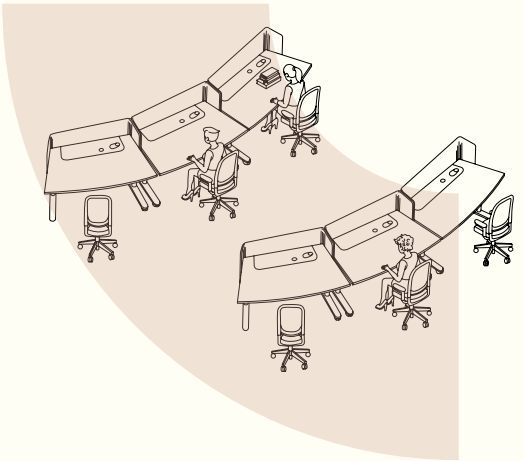

Meeting Rooms

Collaboration Areas

Focus Zones

Technology

Designing Zones that Shape Learning

This floor plan illustrates how thoughtfully designed furniture can transform educational spaces into dynamic environments that support every style of learning. From collaborative hubs that spark group innovation, to acoustic booths that offer quiet refuge for deep focus, each zone is tailored to meet specific pedagogical needs. Whether it's a flexible classroom setup, a dedicated focus area, or a welcoming community space, our furniture solutions adapt to the rhythm of modern education—empowering students and educators alike to thrive in every moment of the learning journey.

WELLNESS & ERGONOMICS

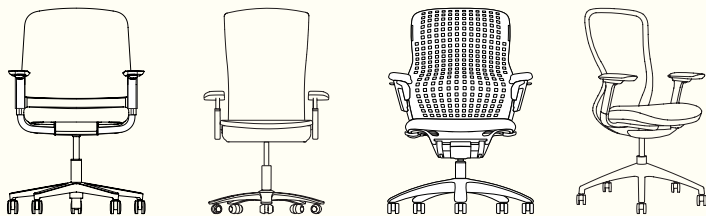

WELLNESS & ERGONOMICS

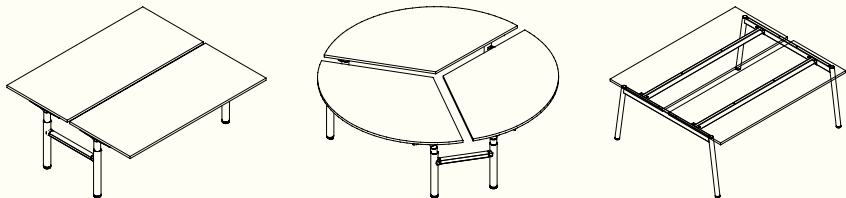

Students can spend an inordinate amount of time seated in study, lectures, or teamwork. Subsequently, ergonomic furniture is essential in education settings, promoting not only physical wellness but also cognitive engagement, productivity, and academic performance.

Traditional seating and workstations often force unnatural postures, leading to preventable musculoskeletal issues. By implementing ergonomically designed furnishings, institutions can foster a learning environment that supports optimal posture, minimises physical strain, and promotes sustained focus.

Zenith offers a vast range of highly responsive, customisable seating and workstation solutions that have been designed to prioritise a healthy posture, and meet AFRDI certification standards.

TASK CHAIRS
Zenith Design Studio works with industry leading designers to create task seating that supports and adapts, allowing the user to move seamlessly between an infinite range of daily sitting positions

WORKSTATIONS
Our vast range of workstations offer options like electric adjust sit/stand to customise to the user's needs. Cable management systems reduce tripping hazards, while optional screens can offer privacy, noise minimisation and defined space for quiet study and focus.

ADAPTABILITY

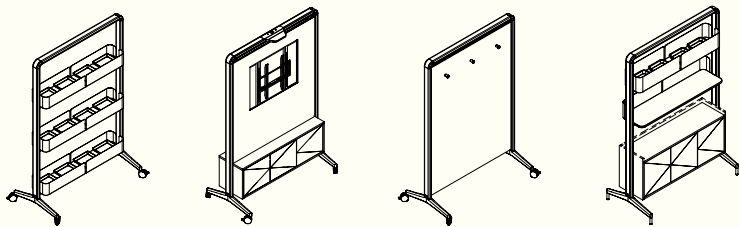

ADAPTABILITY

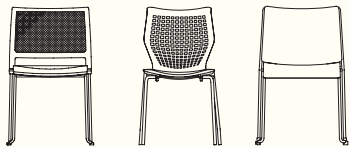

Anticipating and planning for change requires smart design and fluid solutions for the wide variety of activities in the education environment. Education facilities that want to make the most of their real estate require furniture solutions that can be easily adapted for multiple use. The most effective designs empower students to effortlessly adapt their surroundings, enabling seamless transitions between individual learning, group collaboration, and large-scale events.

Zenith offers adaptive, innovative solutions that move and reconfigure to meet the myriad demands of campus spaces

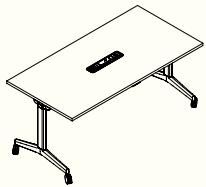

KISSEN CREATE

Kissen Create is a holistic collection of moveable walls that provide a rapid response to the spatial and functional needs of team activities. Featuring a whiteboard, pinboard, digital display, coat rack, shelving with joinery, and planter, Kissen Create can be rapidly configured to activate a bespoke space aligned with team task requirements.

Stacking Chairs

Our stacking chair range combines lightweight design, ergonomic comfort, and sustainable innovation for diverse learning and collaborative settings. From ultra-light, high-density options to eco-friendly designs, each chair offers durability and flexibility. With contoured seats, supportive backrests, transport dollies, and the option of a Tipo chair with an integrated tablet arm, these versatile solutions maximise space, support interaction, and adapt seamlessly to evolving needs.

KISSEN CONFERENCE TABLES

As a multi-functional table for teaching and collaborative environments, the Kissen conference table is unmatched. Kissen conference is a collection of folding tables with a unique two-way folding feature. This omni fold feature allows for activation from both sides of the top and rapid usability. The lightweight frame also makes it easy to move and reconfigure, making it ideal for an adaptive learning facility.

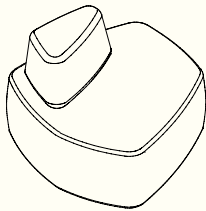

BIOPHILIA

BIOPHILIA

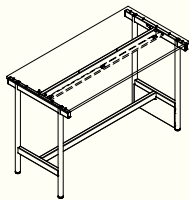

Biophilia refers to the inherent affinity people have for the natural world, developed over the long course of human evolution. Recognised as having a restorative and calming influence, biophilic design is an innovative architectural concept that seeks to integrate natural elements, shapes, colours and patterns into living and learning environments.

Zenith Design Studio incorporate biophilic concepts and themes into their furniture designs, to enhance wellbeing, connection and harmony in learning spaces.

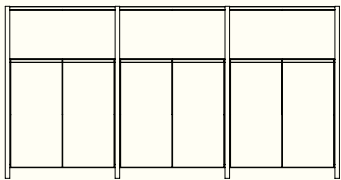

TERRAZZO

Terrazzo is an ottoman range with an organic asymmetric design language enabling small, medium and large pieces to be configured together to create an irregular yet cohesive statement. Terrazzo’s design increases user connectivity to the natural environment through irregular shapes that work together to create a balanced visual serenity.

TEDDY PROJECT TABLES

Teddy Project Tables are designed for versatility and are available with either glides or castors for easy mobility. They also offer the option of low-voltage power integration through the frame, ensuring seamless access to power for team projects. These features make Teddy Project Tables ideal for dynamic collaboration in the learning environment.

MAKR

MAKR Storage Divider System redefines the concept of commercial storage, seamlessly blending form and function to create a dynamic storage solution that elegantly defines space. MAKR is available with planter elements, allowing for foliage to be effortlessly incorporated within learning spaces.

MINUTES

Minutes is a range of generously proportioned coffee tables that celebrate the materiality of oak and feature soft round edges and organic forms. Ideal for multi-purpose zones and break-out areas, Minutes casts a calm and grounded aura.

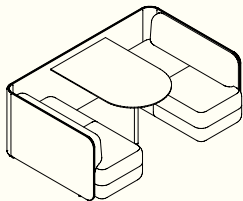

FOCUS

FOCUS

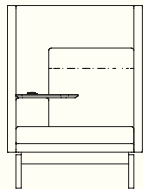

Creating spaces for quiet focus and study in educational environments is essential for student success. Research indicates that high noise levels negatively impact learning, productivity, and overall wellbeing. Spaces with dedicated low noise levels foster an atmosphere where students can concentrate, engage deeply with their tasks, and enhance their learning outcomes. A calm and structured environment reduces sensory overload and distractions, allowing for improved focus and productivity, ultimately supporting a more effective and enriching educational experience.

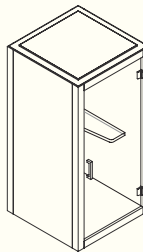

PRECINCT MEET & FOCUS

The Precinct range by Zenith Design Studio is a collection of flexible and versatile structures that offer spatial fluidity for individual and group needs. Precinct Meet and Focus offer private seating havens; their surrounding screens hug the lounges and create a private nook for focused study, quiet calls or conversations.

EDO WORKPOD & WORKLOUNGE

With clean geometric lines inspired by Japanese design, the Edo Workpod and Worklounge are distinguished by their high, isometric surrounds that create a discreet enclave for study and quiet focus.

VERSE 1

Verse 1 is an acoustic pod that provides a serene environment that reduces stress and promotes mental clarity. By offering a private space for relaxation, calls or focused work, Verse 1 contributes to a healthier learning environment.

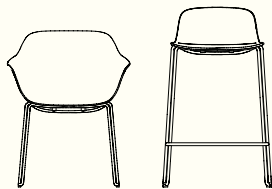

COMMUNITY & COLLABORATION

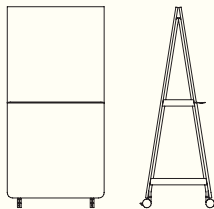

COMMUNITY & COLLABORATION

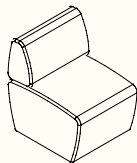

Students thrive in well-designed spaces that encourage interaction, whether through discussions, group projects, or social activities. By creating areas that support learning and collaboration, campuses become dynamic hubs where ideas flow freely. Recognising that learning happens everywhere, it's crucial to provide spaces that bring people together, inspiring creativity, knowledge-sharing, and meaningful connections beyond the traditional classroom.

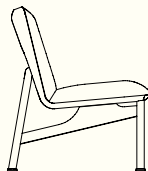

JAC RANGE
Jac is an extensive seating range notable for its streamlined form and clean lines. With models ranging from the durable sled stool, for breakout areas and collaboration tables, right through to the more refined Jac lounge chair, for social lounges and reception areas, Jac offers a seating solution for almost every area of the educational environment.

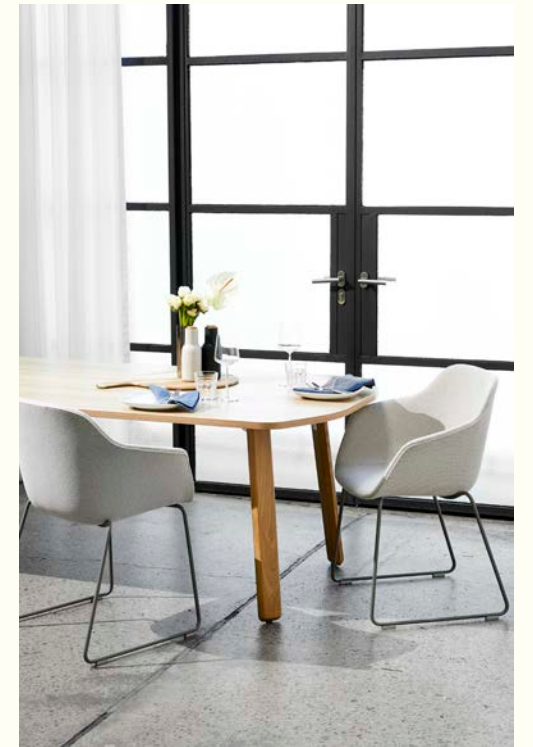

WHITEBOARDS
Idea sharing and brainstorming is an integral part of the collaborative learning process. Zenith offers a selection of whiteboards such as SOL Sketch and ALPHA SPACE, which are mobile collaborative tools for flexible learning.

SOL-EDT
SOL-EDT is a cohesive range of lounges and ottomans that are configurable to suit small or larger spaces. SOL-EDT offers a 'soft' geography; sharp geometric edges are relinquished in favour of rounded angles, in keeping with a more biophilic, welcoming aesthetic.

ALTER LOUNGE
Alter Lounge redefines the modern workplace with elegant solutions for every interaction from impromptu chats to formal meetings. Featuring a minimalist aesthetic, ALTER's extended range includes lounge chairs, benches, and coffee tables featuring timeless timber finishes and soft inviting seating.

TECHNOLOGY

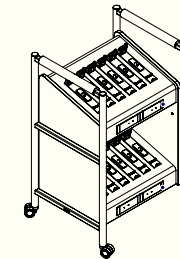

TECHNOLOGY

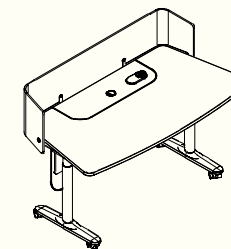

Technology is now essential to learning and teaching, driving digital transformation in education. Institutions are leveraging digital tools to create dynamic, collaborative, and accessible learning experiences. With the right solutions, students can engage with a vast range of knowledge anytime, anywhere, ensuring a more flexible and connected educational journey.

Zenith's technology division, Zenith Connect, integrates technology seamlessly into furniture to deliver transformative solutions for the education sector. By embedding power, data, and wireless connectivity directly into agile furniture systems, Zenith enables untethered technology use, removing reliance on fixed points and rigid layouts. This approach allows educators and students to work anywhere within a space—whether collaborating, presenting, or focusing independently without disruption. Zenith's solutions support the shift towards flexible, reconfigurable, and future ready learning and work environments.

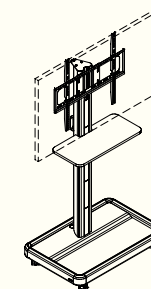

CHARLIE TROLLEY

Charlie Charge Trolley from Zenith is a mobile charging station that provides spatial flexibility and freedom from cable clutter. Charlie features the capacity for a minimum of 3 and a maximum of 12 batteries to be charged simultaneously. With discreet rear charging, the curly charging cable minimises trip hazard risk, offering a safe and versatile solution for teaching and dynamic collaboration spaces.

ORBIS ADAPT

Orbis Adapt is an innovative desking solution that is powered by a fully integrated battery, providing complete cable free mobility. Each desk is suitable for a single occupant and features electric height adjustment, laptop and mobile device charging, privacy screening and folding worktop

STEVE DIGITAL DISPLAY

With the demand for flexible, task focused zones, the need for sharing digital content in learning settings is imperative. Large format untethered displays enable information exchange and dynamic digital collaboration. Steve is a mobile presenter unit, available in 2 sizes, designed to digitally enhance collaboration. Supporting screens up to 90 inches, its lightweight and agile design makes it easy to move to where it's needed. Steve's integrated batteries offer untethered freedom for students to connect and collaborate.

About the project

Founded in 1938 as New England University College, a part of the University of Sydney, the University of New England (UNE) became fully independent in 1954. As a pioneer in distance education, UNE has a long-standing legacy of providing flexible learning opportunities, evolving from correspondence courses to leading online education in Australia.

As a leader in providing durable and adaptive furnishings to the Education sector, Zenith was recently engaged to provide a selection of furnishings for UNE Sydney campus at Parramatta, designed by Arch | Sydney.

About the project

Auckland University of Technology is New Zealand's leading modern university and one of the largest in the country. Their recent (and largest) development at the university's north campus, building AI Tukutuku, is the most sustainable building yet with the lowest CO2 emissions per sqm of built space in Australasia. Designed by Jasmax and engineering consultants Beca, Zenith provided a range of function and sustainable furnishings to fulfill the building's objectives of being an environmentally friendly learning space.

A durable and versatile seating solution was required for high volume areas. The client opted for Zenith's JAC chairs and stools. Thoughtfully designed and solidly constructed, JAC effortlessly fulfills the seating needs for a multitude of spaces and applications. JAC is also the ideal choice to minimise environmental impact: For every JAC sold a tree is planted through Zenith's sustainability initiative. Currently the One Tree project in New Zealand is focused on restoring native biodiversity in Pamoia Forest.

Zenith

We've worked with interior designers, architects and workplace curators for many years. Together, we've developed a range of internal workspace environments. We work alongside these curators of modern workspaces to redefine the environments where people live, work, socialise, interact and learn.

Contemporary workplaces have to combine leading edge technology and physical elements in a way that produces productive environments for organisations. And every organisation is unique. So before we recommend a solution, we work hard to understand the organisation and the people who define its culture.

Our local teams and showrooms deliver the support you need. Our global logistics guarantees the highest quality product, service and delivery schedules.
